Healthy behavior:

- Encourages patients to adhere to their prescribed care plan by reinforcing customized messages and reminders.
- Allows you to personalize care for your patient by giving you the ability to send tailored messages.
- Helps identify trends in health data to adjust treatment plans as needed.
- Helps patients maintain an engaging home environment.

How CAN HOME HEALTH Patients Benefit from Telemonitoring?

- Helps manage your patient’s chronic disease.
- Sends alert when your patient’s vital signs indicate a potential health crisis.
- Allows you to intervene early to prevent an emergency situation.

Other Complex Conditions:

- Diabetes
- Heart Failure (HF)
- Chronic Obstructive Pulmonary Disease (COPD)
- End Stage Renal Disease (ESRD)
